PAUL MRAZ JOINS INVIVO THERAPEUTICS TEAM

Paul Mraz, MSE to advise on Business Advisory Board to develop treatment for traumatic spinal cord injury

Cambridge, MA---InVivo Therapeutics Corporation, a combination cell therapy and tissue engineering focused on restoring function in individuals paralyzed by traumatic spinal cord injury, today announced that Paul Mraz has joined the firm's business advisory board.

Frank Reynolds, InVivo founder and Chief Executive Officer, said, "I am delighted to welcome Mr. Mraz to our business advisory board team. His 19 years experience in the spine industry has added great value to InVivo and we look forward to his continued contribution.

Mr. Mraz currently serves as Chief Executive Officer of CeraPedics, Inc., a medical device company located outside Denver, CO. CeraPedics is working toward commercializing products for the orthopaedic bone graft substitutes market based on its proprietary small peptide technology.

Mr. Mraz most recently served as Chairman and CEO of Angstrom Medica, Inc. (acquired by Pioneer Surgical Technology); a privately funded, early-stage biomaterials nanotechnology company engaged in the development of structural, calcium phosphate-based medical devices for the spinal, sports medicine, and trauma markets.

Prior to Angstrom Medica, Mr. Mraz was a Principal of Link Spine Group Inc., a start-up medical device company that developed and commercialized the world's first total disc replacement for the lumbar spine. Mr. Mraz served as Vice President - Worldwide Marketing and International Sales until its acquisition by Johnson & Johnson in June 2003.

Mr. Mraz also currently serves as a Director of SuperDimension, Ltd. (Herzliya, ISRAEL and Plymouth, MN), an emerging world leader in the minimally-invasive diagnosis and treatment of lung disease (e.g. cancer, emphysema) via interactive real-time guidance of endoscopic tools and bronchoscopy.

Mr. Mraz received a B.S. degree in Mechanical Engineering from Lafayette College and a M.S. degree in Mechanical Engineering and Biomechanics from Case Western Reserve University. Mr. Mraz holds six US Patents for various medical devices and is an active advisor to numerous venture capital groups. Mr. Mraz also enjoys mentoring and advising other entrepreneurs in the medical device industry worldwide.

InVivo Therapeutics Corporation is a Cambridge, MA medical device company focused on combining polymers and stem cells to restore function in individuals paralyzed as a result of traumatic spinal cord injury. The company was founded in 2005 on the basis of research initiated in the laboratories of Robert Langer, ScD, of the Massachusetts Institute of Technology and of Yang (Ted) Teng, MD, PhD, of Harvard Medical School.
